14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ During 2021, Atlas Corp. declared the following cash distributions per share to the Series G preferred shareholders of record as of the dates specified below:

\$0.512500 per share held as of January 29, 2021 (Q1 distributions)

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ Dividends paid in excess of the current and accumulated earnings and profits of a corporation reduce the basis of the shares of the corporation pursuant to Internal Revenue Code 301(c)(2) and 316(a).

The cash distributions declared and paid to date are less than the current and accumulated earnings and profits of Atlas Corp., as forecasted based on Q1 2021 estimated earnings and profits. On such basis, the full amount of the distributions per share were paid out of current and accumulated earnings and profits and are allocated in order of the cash distributions. The basis of each share held as of the date of record should not be affected.

Note that foregoing determination is based on the 2021 forecasted earnings and profits, which are estimates and subject to change as the year progresses. The actual basis reduction, if any, will be determined once the 2021 earnings and profits computations are completed.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ Based on Atlas Corp.'s current and accumulated earnings and profits, the full amount of the distributions per share were paid out of current and accumulated earnings and profits and are allocated in order of the cash distributions. The basis of each share held as of the date of record should not be affected.
