14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ During 2023, Atlas Corp. declared the following cash distributions per share to the Series D preferred shareholders of record as of the dates specified below:

- \$0.496875 per share held as of January 27, 2023 (Q1 distributions)
- \$0.496875 per share held as of April 28, 2023 (Q2 distributions)
- \$0.496875 per share held as of July 28, 2023 (Q3 distributions)
- \$0.496875 per share held as of October 27, 2023 (Q4 distributions)

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ Dividends paid in excess of the current and accumulated earnings and profits of a corporation reduce the basis of the shares of the corporation pursuant to Internal Revenue Code 301(c)(2) and 316(a).

The current year distributions are less than the 2023 earnings and profits of Atlas Corp.
As a result, the basis of each share held as of the date of record should not be affected.

Note that the Q4 year-to-date 2023 basis reduction is based on the 2023 forecasted earnings and profits, which are estimates and subject to change as the year progresses.
The actual basis reduction will be determined once the 2023 earnings and profits computations are completed.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ Based on Atlas Corp's current and accumulated earnings and profits, the full amount of the distributions per share were paid out of current and accumulated earnings and profits and are allocated in order of cash distributions. The basis of each share held as of the date of record should not be affected.
